### **MANA690 LIVE CASE Experience – Course Details**

Building upon the MBA Case Competition Program, this course focuses on strategic implementation and the integration of topics from the core courses within the program. Class exercises are designed to help students integrate and apply their complete education and past experiences to a variety of business situations. Through intensive case analysis and presentations, students will learn to apply theoretical and practical ideas to real situations in a pressure environment. The course will develop analytic, presentation, and social interaction skills to prepare students for today's business environment. In addition, student teams will participate in a 'LIVE' project mandate for a client on the final day of the course.

MBA 690: Live Case Experience is a seminar course that will run for 6 sessions (3 session per week for a two-week period). Offered in full day sessions, the seminar will be divided into three components. The first part will primarily consist of team case presentations, with fellow students evaluating the presentation and asking questions. Both business issues and presentation skills will be addressed. In the second part of the course, case presentations will be presented in front of a panel of judges to simulate the conditions that will exist in the 'LIVE' Case Mandate. Finally, on the final session of the course, each team will prepare a presentation for the 'LIVE' consulting client as part of the final deliverable for the course (see schedule below).
